## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Group I, including claims 2, 66-87 related to *a serving base station which initiates a handoff-related activity for a mobile station based on signal strengths, wherein the serving base station informs the mobile station of a second scrambling code and a second frequency which related to a second base station*. Group II, including claims 53-65, 94-99, 108, related to *a mobile station which initiates a handoff-related activity based on a determined relative signal strength, and transmits signals encoded with the first and second code as a plurality of superimposed signals such that a power of sum of said signals does not exceed a peak power capability of an amplifier of the mobile station, and changes to a new transmit frequency during a period when no voice or signaling messages are being transmitted, and changes to a new receive frequency while no voice or signal messages are being received*. Group III, including claims 88-93, related to *circuitry details of a base station*. Group IV, including claims 100-101, related to *a mobile station which receives a signaling message from a first base station indicating that the mobile station shall be responsive to power control indications from a second base station*. Group V, including claim 102-107, related to *a network controller for controlling handoff procedure*.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T Vo whose telephone number is (703) 308-6728. The examiner can normally be reached on Monday-Friday and alternate Monday from 8:00am-5:30pm.
